

Plain geometry.

Hodaka handling is a matter of geometry. The bike becomes greater than the sum of its parts. The way those parts fit and perform together produces instant, precise, and predictable response.

No Hodaka has this geometry down any better than our out-of-the-crate 100cc racing machine, the Hodaka Super Rat MX. It goes where you point it and *fast*, with no surprises unless you're surprised at being out front. Great power, super suspension, reed valve induction, 28mm Mikuni racing carb, rim locks, heavy duty racing chain, 36" handlebars (cut 'em shorter if you want), 2-

position alloy rear shocks with cooling fins, plastic fenders—these and other performance features come together in a full size 100cc, the Hodaka Super Rat 100 MX, a forgiving but flat-out motocrosser.

If 100cc racing is your thing and you want to improve your lap times, check out the Hodaka Super Rat 100 MX. For free literature and your dealer's name, call the 800 telephone number. If your bag is 125cc MX, ask about the Hodaka Super Combat.
