

**Kawasaki lets the good times roll with Motocross Bikes.**

Motocross has been called one of the most exciting and satisfying sports in the world. And it's been called one of the most physically demanding sports in the world. Because just about every muscle in your body comes into play getting your bike around corners, through water and mud, up and down hills, and over jumps. And if motocrossing is tough on riders, you can imagine how tough it is on bikes.

That's why, for the first time, Kawasaki is introducing a full line of bikes built for motocrossing and motocrossers only. And if you want to know just how handy these rugged Kawasaki bikes are when it comes to winning, ask the 1973 AMA 500cc Champion Motocross Rider. It was a Kawasaki he rode to the championship.
