**THIS IS THE TEAM THAT
TESTS FOR YOU!** DG owns
and races more bikes than any
other performance shop in the
industry. DG riders demand the
very best...it has to work to
WIN...and DG does a lot of
winning with TSUBAKI,
YOKOHAMA, and MIKUNI.
Take a tip from DG call your
nearest Sudco distributor for
TSUBAKI solid roller chains.

TSUBAKI SOLID ROLLER CHAINS

High Durability

Selected Raw Materials—Tsubaki technology has long been involved in joint-study with the worlds finest steel mills to develop suitable steel materials for the particular purpose. All Tsubaki chains are made of specially selected alloy steels based on 60 years roller chain production experience—that makes Tsubaki chain much more durable.

Shot Peened Parts and “Quad-Stake” Riveted Pins—Tsubaki motorcycle chains have a darker unglazed appearance because of shot-peened parts. Favorable residual stresses on chain parts induced by “shot peening” counteract against severe service loads. Besides, heavy press fit and four stake riveting on pin heads add extra favorable strength around the critical apertures.

**Pre-Stressing and
Perfect Pitch Control**

Each pitch of every Tsubaki chain is pre-stressed on actual sprocket teeth applying one-third of the average tensile strength automatically, after assembling process, thereby giving perfect concordance on joint parts and favorable residual stresses. This unique pre-stressing process provides resistance to fatigue failure and better wear properties.

SOLID ROLLER:

420, 425, 428, 428H,
*520, *525, *530, *630

*Racing Series — Quad staked riveting, close tolerance press fits, special heat treatment.
