Send 50¢ for new catalog

We've now got the first kits on the market for Suzuki RM 125 and the Yamaha YZ-C monocross machines. Both are *exact* replicas of factory race machinery! The entire package includes custom porting, milled head (or our own trick porcupine head), "super" pipe, and a larger carburetor. We've also got sleeve down kits for the Honda CR 125, Suzuki RM 125, Kawasaki KX 125, and Yamaha YZ-C Mono, to turn your machine into a 100cc fire breather. All of our performance work is top-notch, just check out Popular Cycling, Dirt Bike, Dirt Rider, and Motocross Action! Other "performance specialists" have kits, but they're all about six months behind what FMF is doing. Top national riders like Marty Smith, Mickey Boone, Tommy Croft, Tim Hart and Chuck Bower have all come to us to make their stock machinery quick. Shouldn't you?
