# Who Is Don Emler?

Since the introduction of motocross racing in America, Southern California has been the hub of hi-performance racing product development. In those days, Don Emler, President of FMF, was designing and building expansion chambers for American Eagle, and later, Suzuki. Doing research and development during the week, and desert racing on weekends, Don quickly became recognized as an authority on 2-stroke engine technology, thereafter;

Don concentrated on designing and fabricating parts for racing motorcycles. Don's motocross bikes set laptime and win records at tracks all over Southern California. The bikes Emler set up were not only fast but also reliable. Don Emler soon became "the" authority in motocross machinery and has worked with Honda, Suzuki, Yamaha, Penton and other racing teams. Don builds the same quality and reliability into every FMF product. He closely supervises all engines modified by FMF. Don is constantly developing new products to make existing bikes even quicker in the dirt. Constant research and development, combined with Don's insistence on perfection, makes FMF the leader in the field of motocross accessories for winning.

## What is Flying Machine Factory?

FMF is a factory race-preparation facility, equipped for all phases of porting, headwork, suspension modifications and engine rebuilding. FMF specifically designs, manufactures and installs high performance equipment for motocross machinery. You can purchase one product or a completely set-up brand new motorcycle incorporating all the FMF modifications. All work is performed on FMF premises by experienced machinists and welders. Flying Machine Factory maintains a large inventory of race-proven products for quick service on mail orders. Orders are processed immediately and shipments go out daily to satisfied riders and racers across the country, including many professional motocross stars. Flying Machine Factory is headquarters for the finest motocross products available anywhere.

### PRODUCTS

Flying Machine Factory manufactures a complete line of high performance motocross products. All FMF products are tested and race-proven offering you the finest quality and performance available anywhere. The entire FMF product line is available through your dealer or direct from our warehouse.
