# WORKSTAND™

Motorcycle Support

"Flak Jak, HiBacks, and now Workstand! We're not here to follow anybody. HRP designs are innovative and premium quality. There is a difference. Check 'em out."

*Bob Fernal*

Finally, a smart solution to an old problem. We've all been setting our bikes up on a milk crate or something similar to work on for years. And they're always the wrong height, tipping over, bending or breaking. Plus, milk crates don't add to a professional look in the pits.

HRP's Workstand motorcycle support solves these problems. It's the right height, a full 16 inches. Tough with rugged 6061 T-6 extruded aluminum corner struts and .140 polyethylene sides and top for solid support of motorcycle and rider. (500 pound capacity).

Dealers may special order Workstands in their own team colors and logo. Minimum order, 25 units. Call HRP for details. Deposit required.

HRP's Workstand is guaranteed for one year against breakage or failure from normal use as a dirt bike support (500 pounds capacity).

Workstands are shipped unassembled with easy to follow assembly instructions. Tools shown in photos are not included.

Traction grid top universally fits any dirt bike and keeps it secure. The wide base assures sturdy support on a wide variety of surfaces.

Workstand features a removable tray sectioned to keep those small parts and tools organized and out of the dirt.

One thing the old milk crate was good for was carrying all the miscellaneous stuff. Just remove the Workstand's tray, turn the Workstand upside down and you've got a carry all.

Workstands are available in bright factory team colors: Honda, Yamaha, Suzuki, Kawasaki, Husquvarna, Maico, KTM. It's also a great display for sponsor logos, name and number. Workstand letters and numbers stocked by HRP.
