

OMEGA 1 AIR SHOCK

The 1st sensible Air Shock for the Serious Racer:

After 3 years of development and testing on motocross tracks and in the desert, we're now offering the OMEGA 1 to the racing public.

R&D on the OMEGA 1 took 3 years because we didn't want "just another air shock." We wanted a sensible, fair-priced, infinitely adjustable air shock.

The OMEGA 1: it's made of 100% aluminum, making it 2 pounds lighter than any other air shock currently available.

The OMEGA 1 uses a low air-pressure system (70 to 130 psi), eliminating the need for exotic expensive air bottles. The OMEGA 1 can be adjusted at the gas station — or even with an ordinary hand pump. Even the oil can be changed without disassembly. It doesn't take 2 engineers and 3 technicians to dial-in the OMEGA 1 to any track conditions.

It's a sensible, simple-to-operate air shock that you can disassemble and assemble at home with basic tools. And when the time comes, you can rebuild it — for less than 7 dollars.

Compare the features of the OMEGA 1 against the competition. Then check the price. A set of OMEGA 1 air shocks, available to fit any motocross machine on the market, costs only \$245 and comes with a 30-day UNCONDITIONAL RACING GUARANTEE!

The OMEGA 1 is available from your dealer now for your Honda, Suzuki, Kawasaki, KTM, Maico, Husqvarna, Bultaco CZ or Montesa motocrosser. Yamaha monoshocks will be available by February 1, 1979.

OMEGA 1 is Manufactured by:
CH Performance Products
8225 Remmet Ave.
Canoga Park, CA 91304

OMEGA 1 is distributed by:
Graham Sheet Metal
13026 Raymer St.
